

FORTHCOMING PUBLICATIONS (A)

JANUARY 2001, Vol 75, No. 1

Proceedings of the 7th Annual Seminar on Condensed Matter Days – 1999 (CMDAYS-99) held at the Department of Physics, Jadavpur University, Jadavpur, Calcutta, during August, 26-28, 1999.

Foreword

SUJATA TARAFDAR AND TAPAS RANJAN MIDDYA

Inaugural Talk

Science as a Culture – its implications

SHYAMAL SENGUPTA

Invited Talks

Absence of localization in disordered and hierarchical lattices : an overview

ARUNAVA CHAKRABARTI

Topological defects in condensed matter systems

AJIT M SRIVASTAVA

Contributed Papers

A. Phonons and correlated Electron Systems

A Green's function approach to estimate lattice relaxation in solid solutions

S DATTA ROY (PAUL) AND S K DAS

Anomalous dispersion of optical phonons in $\text{La}_{2-x}\text{Sr}_x\text{CuO}_4$ at low temperatures

K C BISHOYI, G C ROUT AND S N BEHERA

On the extraction of effective pair interaction of simple metal from third order pseudopotential energy

D SEN, A SARKAR AND S HALDAR

Pseudopotential theory of effective pair interaction in Al

S HALDAR, A SARKAR AND D SEN

Static local field factor for spin interacting system

A SARKAR, S HALDAR, D SEN AND D ROY

Thermal variation of different specific heat components of potassium europium fluoride

SULAVA BHATTACHARYYA

Effect of crystal orientation in GaAs on microwave negative and series positive resistances of flat profile DDR

S P PATI, S SATAPATHY AND S K DASH

Scattering of a bound polaron in an external laser field

C SINHA AND SUKLA MUKHOPADHYAY

Microscopic theory of electron-phonon coupling mechanism in heavy fermion systems:
A finite q and T calculation

S MOHANTY AND P NAYAK

[Cont'd. on next page]

B. Nanomaterials Surface Physics and Devices

Production of semiconductor quantum dots on polymer matrix by chemical method and their size control

D MOHANTA, S K DOLUI AND A CHOUDHURY

On L-C-R and rectification properties of anodic ZnO thin film

TAPAN SENGUPTA

On relativistic study of a simple one-dimensional model of the field emission microscope

G ROY

C. Complex Systems, Superconductors and Bio-materials

Effect of diethylnitrosamine on the anisotropy of the liposomal membranes

SHASHIPRABHA DASGUPTA, DIPAK DASGUPTA, ANINDITA CHAKRABORTY
AND PAPIYA NANDY

Scale invariant finger length distribution in viscous fingering patterns

APARNA ROY, SHASHWATI ROY, A J BHATTACHARYYA AND S TARAFDAR

Electronic properties and compound formation in LiPb molten alloys

A K RUKHAIYAR, V N SINGH, A K MISHRA AND R N SINGH

Pseudogap and electrical properties in normal state cuprates

I CHAUDHURI, S K GHATAK AND A TARAPHDER

An experimental investigation of electrical conductivities in gum Arabica

H MALICK AND A SARKAR

D. Soft condensed Matter and Liquids

A generalized model for the structural investigation of liquid Li_4Ph

ALOK SATPATHY

Phase equilibria of polar Lennard – Jones fluids

SHANKAR S KARKI AND SURESH K SINHA

A perturbation theory of classical simple fluids

TARUN K DEY, BIMAL P KARKI AND SURESH K SINHA

H-bonded clusters in liquid *tert*-butanol through neutron diffraction

P S R KRISHNA AND R N JOARDER

The limit of superheat of liquids

MALA DAS, B K CHATTERJEE, B ROY AND S C ROY

List of Participants
